## Canvas Game, Anantapur

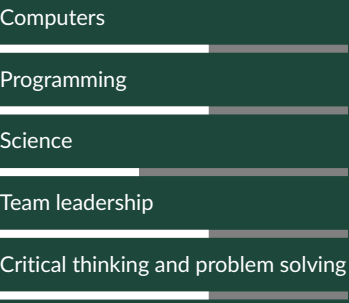

09/2023 - 09/2023

"Led the creation of a game built on a canvas using JavaScript and Three.js. Proudly oversaw the project's design, development, implementation, and deployment to achieve a high-quality, easily-expandable product. Introduced iterative development, where the product was developed and tested in stages rather than all at once, along with continuous feedback integration."

Led the creation of a game built on a canvas using JavaScript and Three.js. Proudly oversaw the project's design, development, implementation, and deployment to achieve a high-quality, easily-expandable product. Introduced iterative development, where the product was developed and tested in stages rather than all at once, along with continuous feedback integration.

## My space Portfolio, Anantapur

Built a portfolio website using Next.js which is a full stack react application. js, emphasizing on the cloud and scalability. Agile development methodologies and methodologies that support continuous integration such as Jenkins as well as Docker were employed in the development process. Searched for the best performance both on the desktop and on the mobile version of the platform.
